LOOKING TO CREATE A BEAUTIFUL, WARM AND NATURAL INTERIOR DESIGN USING WOODEN FLOORS?

With the Span floors collection of laminate flooring, you do not need to look further. The challenge with laminate floors is to make them look real since laminate floor is basically a picture of real wood printed on a paper and then stuck on to a board made of wood saw dust.

At Spanfloors, we scout the world and look for superb quality laminate floors produced by the top international brands and bring them to India so that you can use them to create some real awesome rooms! Feel free to look at our collection and compare it with the competition. Our promise is LOOK AND FEEL OF REAL WOOD AT LESS THAN HALF THE COST of engineered or solid wood floors. While honestly, it can not be the same as a real wood floor, what is true is that it comes very close.

Need more proof? Have a look at the showroom display or ask for samples for a touch and feel. Or see the pictures of numerous beautiful homes where we have helped homeowners and designers like you create some seriously good looking floors.

4 KEY PROMISES OF SPAN FLOORS

AESTHETICS

We offer the best of the best in the world, which is why you will find a wide variety of beautiful laminate floors in our collection. From very light to mid-browns to dark to fashionable greys, we are sure you will find something to go with your dream interior design. In addition, we offer a variety of formats, such as planks, herringbones or chic chevron, to go with the coolest design trends!

DURABILITY

Beauty, at our end, is not skin deep. It goes deeper, much deeper. For example, the Span Floors laminate flooring collection is mainly in 10 mm and 12 mm thickness. This makes the flooring really robust and able to take the day to day knocks rather easily. In addition the locking systems are very strong too allowing the flooring planks to stay together and look nice in the long run. Now what about the daily traffic in a typical Indian home? Well, we have taken care of that too. The scratch resistant coating on top makes the planks very resistant to abrasion caused by dust under the feet. And what about moisture? Again, the core board of our laminate floors is quite water resistant. Additionally our latest AQUAPro collection is even more resistant to water. While flooding will destroy any laminate floor but short of that you are in good hands. Just ask for and follow the instructions.

HEALTH

Now this may come as a surprise but there is a connection with health too. The raw materials used while manufacturing laminate flooring contain some amounts of chemicals like other building materials. We take care to source our finished floors only from reliable manufacturers who have the necessary certifications in this regard. This means after installation you do not have to worry about any off gassing from the product which is beyond the permissible limits set by the stringent European and US standards. All products come with necessary 3rd party certifications.

SUSTAINABILITY

No one wants to beautify their homes at the cost of the general environment. Right? We know that you care for the planet just as much as we do. So we have taken the necessary care to offer you laminate flooring that is made of wood exclusively from certified forestry operations. Once again you can ask for the necessary 3rd party certifications that our manufacturers adhere to.

CERTIFICATIONS

* Not all certifications apply to all products. For exact information, please ask.

** Above logos are used with permission from respective manufacturers.

“

Had a wonderful experience with Span Floors. We recently had our house built and got the wooden flooring and facade wood from Span Floors. We were really impressed by the product range, staff, product quality and the services we got by the team. Our whole experience was very smooth and would definitely recommend their services.

Mr. Bobby Gujral
Homeowner

AIRY LIGHT TONES

Lighter wooden flooring can have a significant impact on interior design. It can make a space feel more open and bright and can create a modern and sleek aesthetic. Lighter-coloured wood can also complement various design styles, from Scandinavian to mid-century modern. Additionally, lighter wood floors can highlight other interior design elements, such as furniture or artwork. Lighter wooden flooring can be an excellent choice for creating a fresh and inviting interior space.

16 - LAMINATE WOOD FLOORING

WHITE, GREY AND BLACK TONES

White, grey, and black tones of wooden flooring can have a significant impact on the overall look and feel of an interior space. White tones give a bright and crisp feel, making a space appear larger and more open. Grey tones create a calming and sophisticated atmosphere, while black tones provide a bold and dramatic statement. The choice of tone depends on the desired style and ambience of the room. It is essential to consider other elements of the space, such as wall colour and furniture, when selecting the tone of wooden flooring to ensure a cohesive and harmonious design.

Medium natural tones of wooden flooring bring a warm and inviting touch to any interior space. The natural tones and grains of the wood create a sense of comfort and calmness while also adding texture and depth to the room. This type of flooring is versatile and can complement a variety of design styles, from modern to traditional. These tones make an excellent choice for creating warm and comfortable spaces.

EARTHY BROWN TONES

Using earthy brown tones of wooden flooring can create a regal and elegant atmosphere in any interior. The natural beauty of wood adds character and texture to a space, making it feel cosy and grounded. Earthy brown tones can also complement a wide range of colour schemes and design styles, from rustic to modern. These darker tones make an excellent choice for creating an elegant and sophisticated space.

THE SPAN FLOORS STORY

Satinder Chawla director of Span Floors opens heart to reveal the story behind success.

Q. What is Span Floors story (from beginning to today)? How did Span Floors came into existence?

From the beginning, I had a passion for beautiful spaces. When I first came across wood floors in the year 2000. I just fell in love with them and wanted one for my room right away. One thing led to another and being in the industry soon we were selling them! That was the start of our wood flooring business.

Q. What Span Floors as a brand stands for?

Chic Design and World class Quality. These 2 characteristics describe our entire business offering.

Q. Take us through your product and offerings and who are the audience for the same?

Our laminate collection is ideal for design and quality conscious people who want the realism and effect of a real wood floor yet do not want to spend as much. The authenticity has to be seen to be believed.

Besides aesthetics, the technical specs are top notch too! All our products are being manufactured in international world-class manufacturing plants at the highest quality levels. Not only that these manufacturers are certified FSC or PEFC or an equivalent stringent certification and meet strict indoor air-quality norms such as E1, Green guard etc.

Q. What about your new website? We hear it is designed for amazing online customer experience?

Yes, the website is designed to be simple, intuitive and interactive. We specifically took care to present only the most relevant data so as to cut unnecessary clutter. Information is laid out in a simple, easy to navigate manner so that the sought information is gathered and understood quickly.

Q. What tips can you give to those who are interested in buying laminate floors? What few key points one should keep in mind?

People generally go by aesthetics as the first parameter. So if they like something they check the price and so on... No doubt, how the product looks is extremely important as ultimately that is going to affect the visual outcome of the room.

However, the other equally important concern should be the expected in-service lifespan of the product, it's ability to take the day to day usage and the impact the product has on the well being of the room occupants.

Last but not the least, the best of the product can go waste without proper technical advice and installation. Do look for the quality of advice from the vendor. This will be a guide as to how much he understands his own product and his ability to help you in case of any service need in future.

Q. Can you please share your vision for next 3-5 years?

Our vision is clear. We will continue to work relentlessly to retain our leadership in the designer wood flooring segment.

We fully understand that this leadership has been only been possible due to the trust our esteemed End Users, Architects, Designers and Chanel Partners continue to place on us and the ongoing hard work of the entire Span Floors team and our international partners.

BEAUTY WITH BRAIN

The Span Floors laminate flooring collection comes with top of the line technical specs. Not only our floors look nice, but they are strong too! Read on below for further information.

SCRATCH RESISTANT

Tested to high Abrasion Class, our floors can withstand the toughest residential and moderate commercial requirements.

WATER RESISTANT

The high quality core in all our floors is strong enough to handle the routine moisture found in air as well as an occasional accidental drink spill. The strong click joints are an added protection.

SOUND REDUCTION

World class underlays tremendously affect both in room as well as below room acoustics. Now have a solid glued down floor sound effect!

EASY INSTALLATION

The easy to use patented click fixing system makes installing Span laminate floors a breeze. You could even take your floor along when you move and refit.

HYGENIC

The surface of our laminate floors is nonporous & compact. This means that natural organisms do not have the necessary conditions to flourish. Day to day cleaning without any additives is enough to maintain a high level of cleanliness.

HIGH FIRE RESISTANCE

Our laminate floors achieve the rating Bfl-si with regards to burning behaviour and smoke emission as per the current European norms.

IMPACT RESISTANCE

Tested to exacting European norms, the impact resistance belongs to class 32/33 depending on the collection. Your floor can easily take the knocks from day to day life and your high heels.

EASIER CLEANING

Use a broom & a well wrung mop to take care of the routine cleaning. No special equipment needed.

FLOOR CLEANING AND MAINTENANCE

Bona Spray Mop for Laminate floors enables you to clean and maintain your floors in a sweep. Ergonomic and simple to use, the Spray Mopp is quick to assemble and refill with the specially developed Laminate cleaner. Forget filling up a bucket and adding concentrate, just spray and clean! You can use this cleaner on tile, laminate, and other hard surfaces such as ceramic, linoleum, vinyl, granite and more.

Ergonomic and simple to use, the Spray Mopp is quick to assemble and refill with the specially developed Laminate cleaner. Forget filling up a bucket and adding concentrate - just spray and clean!

WE ARE HERE TO HELP

OUR GUARANTEES

Our floors have been developed for a long product life. And because only tested quality leaves the factory, all our products carry a warranty directly by the international manufacturers. You are requested to go through the warranty terms and make yourself aware of the conditions so as to get the best out of your purchase. Detailed warranty can be requested by contacting us at floors@spanfloors.com.

DISCLAIMER

Colours as appearing in the catalogue may differ from actual products. Refer to actual samples for a more accurate impression. Also note wood being a natural product will have variation even within the same colour tone.

DELIVERY

Your satisfaction is our goal. Therefore, all products are normally available ex stock, and thus as soon as possible at your site.

VISIT US ON WWW.SPANFLOORS.COM TOO

Besides the information available in this brochure, you will find additional information about us and our products at www.spanfloors.com. From the product portfolio through to new product features and technical information, our internet platform provides everything you are looking for.

YOUR LOCAL CONTACT

We have an expanded pan India sales channel. For information on our local retail partner please visit www.spanfloors.com or else write us directly at floors@spanfloors.com.

At Span Floors we understand our responsibility towards the environment. A big range of products conform to PEFC™ certification (certified at manufacturer's end).

This means that the wood types used for panels are from sustainability managed forests, recycled and controlled sources.

*Applicable for select products.
